Professional Experience

Multiplier Brand Solutions Pvt. Ltd.

New Delhi, Delhi 110044

EXECUTIVE - TECH (PHP DEVELOPER)

Sep 2025 - Present

- Developed and maintained backend modules for **HRM, ERP, and Time Management System, Visitor Management System**, handling employee data and workflow processes.
- Built and integrated **RESTful APIs**, implementing secure authentication and role-based access control for different user levels.
- Designed and optimized **MySQL database schemas and complex queries** to improve performance and ensure efficient data handling.
- Worked on **CI migration (CI2 to CI4)**, AOP system development, **third-party API integrations**, and managed deployment.

Neuailes Global Technologies Pvt. Ltd.

Noida, Uttar Pradesh- 201301

PHP DEVELOPER

May 2023 - June 2025

- Contributed to the Email Security Software (GoDMARC) by designing the frontend UI and handling the Accounts Module for billing generation and service expiry tracking. Also Conducted **manual testing and debugging**, improving software stability by 30%.
- Resolved 100% of technical errors and SEO warnings** across 3 company websites using SEMrush, resulting in **improved Google PageSpeed and crawlability**
- Built a bulk email marketing website using Laravel, where the most impactful addition was the Pricing Module, which allowed users to easily calculate plan costs—**increasing client inquiries and conversions by approximately 20%**.
- Managed the **GoSimulator product** end-to-end, a phishing simulation tool used by companies for employee training, creating fully responsive, theme-based templates with interactive FAQs and phishing landing pages mimicking services like Microsoft, Zoho, and browser warning pop-ups, leading to a 35% increase in lead capture and significantly improving client satisfaction with simulation effectiveness.
- Completed probation in less than 6 months and received an early salary increment based on performance.**

Hedkey India pvt. ltd

New Delhi, Delhi 110059

FULL STACK WEB DEVELOPER

October 2022 - March 2023

- Developed a **dynamic business website** for a company, implementing an admin panel to manage products with categories and subcategories, improving web visibility and performance by reducing static dependencies by 40%.
- Led the **end-to-end development of a Blog Posting System** for an educational institute using Core PHP, integrating features like post creation, category filtering, admin login, and a fully responsive layout.

Projects

Support Management System

PHP, MySQL, CODEIGNITER 3

- Designed and developed a ticket-based support system with user and admin panels for raising, assigning, and tracking issues.
- Implemented **role-based access control** and automated **email notifications** to improve response time and issue resolution.

ERP System (Enterprise resource planning)

PHP, CODEIGNITER (CI2 TO CI4 MIGRATION)

- Migrated ERP system from **CodeIgniter 2 to CodeIgniter 4**, improving performance, security, and code maintainability.
- Developed and enhanced backend modules to streamline **business workflows and data management**.

HRM, Time Management System

PHP, CODEIGNITER 4, MySQL

- Built backend modules for employee management, attendance tracking, leave management, and HR operations.
- Implemented features for posting, employee records, and workflow management with secure role-based access.
